Item	Item	Action required & pass/fail		Comments	Pass/Fail
No.	100.11	requirement	Annual		1 435/1 441
4	Frictional forces and self-closing and self- latching function	(a) CHECK the opening and closing forces comply with the requirements AS/NSZ 1905.1.	1	Please refer to inspection report 5274 for full details.	Failed: FD12
	-	NOTE: This may require adjustment of hinges, latchbolt, door seals and door closer operating force (see below).			
		(b) CHECK the door set is self-closing and self latching in accordance with AS/NZS 1905.1	/		PASS
5	Doors held in the open position	TEST for the fire doors, held in the open position, that require activation of detection system to close, ensuring that the fire doors close satisfactorily upon power failure or detector activation.	✓		PASS
6	Locksets and latchsets	(a) Operate latchset and VERIFY the latchbolt engages into the striker plate sufficiently to hor the door in the closed position.		Please refer to inspection report 5274 for full details.	Failed: FD12, FD14
		(b) CHECK latch handle(s) and latchbolt(s) are clean and operate freely and smoothly.	*		PASS
		(c) Where passage sets or knobs are no orpo ated, CHECK that the minimum clearance of mm to the door stop is present.	~		PASS
7	Door closers and pivots	CHECK: (a) The closer arm and any pivots operate freely and	✓	Please refer to inspection report 5274 for full details.	Failed: FD12
		smoothly. (b) The door set is free from any closer oil leakages.	~		PASS
		(c) The screw fixing and mounting arrangements for door closer are secure to the door leaf and door frame.	~		PASS
		(d) The door closer body is free from obstructions by walls, fixtures and/or fittings at any point throughout its swing.			PASS
		(e) The door closes fully and latches.	✓	Please refer to inspection report 5274 for full details.	Failed: FD2
		(f) Cushioned back-checking action takes place as per the requirements of AS/NZS 1905.1.	~		PASS
		(g) For doors with magnetic hold-open devices, the door leaf comes to the fully closed and latched position upon release of the hold-open device.	~		PASS

Item	Item	Action required & pass/fail		Comments	Pass/Fail
No.	Tem	requirement	Annual	Comments	1 855/1 411
8	Hinges	CHECK:	✓		PASS
		(a) Hinges are free from any undue wear and tear and are correctly aligned and operating smoothly and freely.			
		(b) Hinges are securely fixed to the door leaf and frame.	✓		PASS
		(c) Hinge pins are home.	✓		PASS
9	Door seals	CHECK any installed door seals are approved for use on the fire-rated door set and are functioning as intended and the gaskets are not damaged.	~		PASS
10	Door leaves	CHECK:	Ve		PASS
		(a) Doors are free from any visible delaming non, buckling, warping, bowing, twisting or sign. Scant damage.	•		
		(b) Door edges are in good condition and free from any splitting or damage on all sices.	/		PASS
		(c) Door is of compliant con truction.	~		PASS
11	Door frames	CHECK	✓		PASS
		(a) Door frames are adequately anchored to the walling and restrained against rotational movement about their longitudinal axes.			
		(b) Steel door frames are back-filled if required for the proprietary door type and FRL.	✓		PASS
		(c) Doorstop dimension is 25 mm or ensure that other stop dimension are approved for the proprietary door type and FRL, or that an approved intumescent perimeter seal is not incorporated.	~		PASS
		(d) Doorframe is free from excessive distortion at any point along frame sections.	✓		PASS
		(e) To ensure doorframe incorporates a door striker plate.	/	Please refer to inspection report 5274 for full details.	Failed: FD13
		(f) Rubber buffers are not present, thus creating an additional gap for smoke to spread.	✓		PASS

Site Name: Building XYZ Address: 123 Sample St, Sampleton

Site Na	8		Jung	ole St, Sampleton	
Item No.	Item	Action required & pass/fail requirement	Annual	Comments	Pass/Fail
12	Vision panels	CHECK:	~		PASS
		(a) Proprietary door type is approved for use of a vision panel.			
		(b) Vision panel frame type, glass type and size are consistent with fire-tested approvals.	/		PASS
		(c) Opening size does not exceed 65 000 sq mm without incorporation of a fully insulating intumescent type glass.	/		PASS
		(d) To ensure glass is in a sound condition and free from cracks.	/		PASS
		(e) To ensure perimeter trim and framing are soure and in sound condition and that all fixing screws be in place.)	PASS
13	Fire-rated air transfer grilles or fire dampers	CHECK:			PASS
		(a) Proprietary door type is approved for use of a fire-resistant air transfer grille or tire 'ampe	1		
		(b) For drop shutter type doors, the fusible link is present and is of the correct ten perature rating and ensure correct operation of cop snutter mechanism.	~		PASS
		(c) Intumescent type fire compers and ensure intumescent fire damper is installed behind the cove grilles and that perime er clearance is not excessive and is filled with intumescent type mastic.	/		PASS
		(d) Cover grilles are not damaged and are securely fixed to door leaf.	/		PASS
14	Kickplates	CHECK to ensure kickplates are securely fixed.	~		PASS
15	Selective sequence for	CHECK to ensure:	/		PASS
	pairs of doors	(a) For 'T-Bar type' meeting stiles, or for rebated meeting stiles, that the sequence of door closure is correct.			
		(b) The condition of the selective sequence devices is satisfactory.	/		PASS
		(c) The fixings provided are secure.	/		PASS
16	Meeting stiles for pairs of doors	CHECK to ensure any essential meeting stile astragals are installed and in good working order and incorporate the necessary smoke seal.	~		PASS

Item No.	Item	Action required & pass/fail requirement	Annual	Comments	Pass/Fail
17	Door Access	Access provided to allow technician to meet inspection requirements under Australian standards.	/	Please refer to inspection report 5274 for full details.	Failed: FD7

IMPORTANT NOTICE: We attach for your attention the required remedial works to non-compliance fire door sets as nominated that this building is inspected and tested at intervals in compliance with QDC, part MP6.1 and A.S 1851 (2012) (2015)

During our planned test and inspection of your fire rated access panels, fire and smoke doors we note there may be critical and non-critical defect as per (QDC 6.1 Queensland) Or AS 1851 (2012). The definition of a critical defect provided in the Building Fire Safety Regulation 2008 is "a defect that is likely to render the fire safety installation inoperable and the defect is reasonably likely to have a significant impact on the safety of occupants of part or all of the building if a fire or hazardous materials emergency happens". For the purposes of these notes: inoperable is defined in the dictionary as "Not able to perform its normal function". For the purposes of these notes: significant is defined in the dictionary as "Likely to have a major affect".

The Queensland Fire & Rescue Service would usually determine a critical defect as something that affects a fire safety installation sufficiently so as to prevent it from performing to its normal function. For this reason, we believe some on-critical defects if not all in fire doors, smoke doors and fire rated access panels may also affect a fire safety installation sufficiently so as to prevent it from proming its normal function and strongly recommend all defects be carried out as soon as possible within 30 days of receipt property. Note: In order to comply with requirements of QDC 6.1 and A.S. 1851 (2012), outstanding defects will be noted on the Annual Condition Report.
